Individual declaration

Name: Mohammed Osama Hasan

Registration number: 25/27014

Institutional username: ug2527014@ines.ac.rw

Verification code: AI-A2-7014

Programme item: SWE 3513 Artificial Intelligence, Individual Assignment 2

Date: 18 October 2026

I submit the Musanze Harvest Intelligence Service as my individual assignment. The dataset, fingerprint, metrics, plots, and saved models were produced by running the code in this repository with seed 7014. The dataset is synthetic. I will not present it as a record of real farms.

An AI coding assistant in Cursor helped draft the programs and the report. That help is described in evidence/AI_USE.md. I am responsible for explaining the system and for making a small change to it if the assessor asks, such as a range rule or a response field.

I understand that the service is a classroom prototype. It does not replace an agronomist and it must not be used to decide finance, insurance, or access to a public service.
